EDUCATION

- Trinity Academy of Engineering, Savitribai Phule Pune University (SPPU)** Pune, India
Bachelor of Engineering in Electronics and Telecommunication Nov. 2022 – June 2026
Final Year SGPA: 8.82, CGPA: 7.29
- Municipal Junior College** Maharashtra, India
Higher Secondary Education; Percentage: 87.67% March 2022
- Yashodham Public School** Maharashtra, India
Central Board of Secondary Education; Percentage: 70% July 2020

EXPERIENCE

- Huda's Technologies** July 2025 – Jan 2026
Software Developer Intern
- Assisted in the development and refinement of web-based applications using HTML, CSS, JavaScript, React, and MySQL.
 - Worked on implementing and refining frontend interfaces, functionality, and UI requirements for web applications.
 - Applied debugging and testing practices to identify and resolve functional and interface-level issues.
 - Used Git for version control and supported application deployment and development workflows.
 - Worked with database-driven web application concepts, including data handling and integration between application components and databases.

PROJECTS

- Automated Ration Dispensing System** | *ESP32, AWS DynamoDB, Embedded C/C++*
- Developed an automated ration dispensing system integrating RFID authentication, load-cell sensing, and motor-controlled dispensing.
 - Integrated AWS DynamoDB for cloud-based storage and management of user, quota, and transaction data.
 - Implemented weight-based dispensing logic to control the motor and accurately dispense the required quantity.
 - Connected the embedded system to the cloud for transaction logging and data management.
- Automated Braking System** | *Arduino UNO, C/C++, Infrared Sensors, Motor Driver*
- Developed an automated braking system using Arduino UNO and infrared sensors to detect obstacles based on proximity.
 - Implemented proximity-based speed control, progressively reducing motor speed as an obstacle approaches.
 - Integrated DC motors and a motor driver to execute real-time speed adjustments based on sensor readings.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript
Databases: PostgreSQL, MySQL, AWS DynamoDB
Web Technologies: HTML, CSS, React, REST APIs, JSON
Tools: Git, GitHub, Jupyter Notebook, PyCharm, VS Code, Postman
Core Concepts: OOP, DBMS, Data Structures & Algorithms, Database Design
